New Generation Course- Integrated M.Sc. Programme in Basic Sciences- Physics

The institution takes pride in introducing a New Generation Course- Integrated M.Sc. Programme in Basic Sciences- Physics in 2020-21. The new generation courses were designed to suit industry requirements and help students to utilize employment opportunities in emerging areas of technology or help them start entrepreneurial ventures. It will help students to pursue graduation and post-graduation within 5 years without the hassle of pursuing admission for post-graduation as seen in conventional degree courses. New Generation Courses provide students with a fresh new learning experience and enhanced supports so students receive help when they need it. The courses also actively engage students in their learning with multiple instructional approaches to address various learning styles and self-pacing that will let students move ahead.

B. Voc. Courses

The institution takes pride in introducing UGC assisted 3 vocational courses from 2018-19 namely

- **B. Voc. Fashion Technology & Merchandising**
- **B. Voc. Renewable Energy Technology & Management**
- **B. Voc. Tourism & Hospitality Management.**

B. Voc. Course is a programme that is offered to undergraduates. But unlike regular courses, B. Voc. is mapped with job role descriptions as per National Skills Qualification Framework (NSQF). The curriculum is made in such a way that it is work-integrated and to keep at par with the industry requirements. The course is different from traditional academic programmes as it deals more with application- based studies rather than focusing on theoretical knowledge.

One of the biggest advantages of pursuing B. Voc. against common degree courses is that a candidate has multiple exit points during the programme and continued industry exposure. Even if the student is not able to complete the 3-year programme she will still get a diploma and an advanced diploma after the completion of the first and second years respectively. Hence the knowledge and skills she acquire are valued at every level and she will receive a suitable job according to the market requirements.
